

## **Freund or Freud?**

by Michael E. Stone

An I is more complicated than it seems  
More complicated than I like to think  
Find it multi-layered, sneaky  
seeking in one path  
an outlet to other needs  
Yet writing as writing persists

Why is bringing forth words harder than the need  
deliberately flowing or not freely to think  
To use the brain-that-sweats for the brain that sings  
The myriad worlds set blindly sinking before me  
Ready for a boot or a current jolt to tear me open at the seems.
